COLORBOND[®] steel Studio colour requests

Worth doing, worth Dulux.[®]

Worth doing. Worth Dulux.®

The Dulux World of Colour Powder Coat Series features a number of popular COLORBOND® steel colours available in the stocked range of Dulux Powder Coat products, suitable for aluminium and steel substrates.

This document details the process for matching Dulux Powder Coatings to the colours listed on the COLORBOND® steel Studio.

Colorbond®

Step 1

You'll need the below information handy to help ensure our consultants can provide the right advice:

- ✓ What COLORBOND® steel Studio colour are you interested in matching?
- ✓ What are you coating (i.e. project type and components)?
- ✓ How much are you coating (i.e. approx. square meters)?
- ✓ Your project location

Step 2

Call the Dulux Powder Coatings Advice Line on 13 24 99 with the above information.

Our consultants will be able to advise whether we have a close colour match available in our stocked range of Dulux Powder Coat products OR if you need to consider using our CustomColour™ service.

Colours displayed online should be used as a guide only for your colour selection. We recommend always confirming your colour choice with a powder coated swatch for final colour approval.

Step 3

Dulux will manage your enquiry with your powder coater via a local representative.

What is CustomColour™?

CustomColour™ is a premium service available to building and design professionals for customised powder colours produced by Dulux Powder Coatings on a made to order basis.

CustomColour™ considerations

Minimum quantities:

Due to the nature of the manufacturing process, there are minimum quantities required to produce CustomColours™. Minimum quantities are 50kg for Gloss, Satin and Flat and 80kg for Matt finishes. A minimum 300kg quantity may be required for some pearlescent colours.

Lead times:

The timeframe required to create and provide swatch samples of your CustomColour™ is usually 10 working days. Once samples and quotes are approved, it will take 3-6 weeks to factory produce and supply your CustomColour™. More accurate timing is provided once samples are approved and an order is placed.

Affordability:

CustomColour™ powder coatings are produced on a made to order basis and therefore attract a premium price. Your powder coater will be able to provide you with a detailed quotation. A list of Dulux Accredited Powder Coaters can be found at duluxpowders.com.au/find-accredited-powder-coaters/

Project type:

The environment, conditions, commercial nature and warranty requirements of the project, will determine the technology and therefore the product range required. For example Duratec for external commercial projects or Duralloy for external residential projects (< 4 levels). Not all colours can be accurately produced using all product technologies.

Advice line

Our dedicated consultants can help simplify the specification process, saving you time and money by providing the right coating advice for your project. They can provide:

- Documented project specific specifications
- Written confirmation of your project's eligibility for an Alumi Shield™ or Steel Shield™ warranty
- Design, coating system and colour advice
