RC - RapidCure Technology enables a possible reduction in energy consumption through lower cure temperatures, and or faster line speed

CB - Colorbond[®] and the Colorbond colour names are registered trademarks of Bluescope Steel Limited.

[#] Light Reflectance Value (LRV): The total amount of visible light reflected from the coating, expressed as a percentage of total incoming light. Surfaces with higher light reflectance values appear lighter while surfaces with low light reflectance values appear darker.

Specular Light Reflectance: The portion of incoming light that is reflected such that the reflected ray is at the same angle to the surface normal as the incoming ray. Specular light reflection is expressed as a percentage of total incoming light. Surfaces with a lower specular reflection produce less glare as they scatter or absorb a greater portion of the incoming light.
